Product Description

Magnetic Boards

Our writing boards has triple acrylic resin coat and has imported steel surface that gives a Glossy touch. These writing boards are available in a thickness of 0.40 mm and are offered with special Chemical treatment to ensure crack proof, rust free and stain resistance. Due to steel surface, our Writing boards attract magnet.

Green Writing Board

Green chalk boards manufactured at Writing Concept are of topmost quality. Manufactured of finest quality raw materials, these boards are available in matte finish. These green chalk boards are laminated coated and easy to clean. There is less use of chalks and the visibility is good. These are the features of green chalk boards – comfortable writing, good visibility, easy eras ability and chalk dust is minimal

DISPLAY BOARDS

Soft Pin Board

Manufactured and supplies high quality soft pin boards used to pin up pictures and documents. These pin boards are available various natural colors and fabric surface of red, green, blue, maroon and black color. Mostly in matte finish the fabrics on the boards are elegant in look and add complete style to the interior décor. Raw materials that we use in the manufacturing are excellent and make the product very durable and ensure proper functioning.

Combination Boards:

Combination Board (Ceramic + Pin)

Combination Boards are combination of any two types of boards. Here it is ceramic and pin for combination board (ceramic + pin). Used for writing as well as putting pictures on displays, these combination boards are perfect for school, colleges or offices too. We make these boards with total care and make every effort to make every single piece defect-free. We use best quality raw materials from well know vendors in the industry to make these combination boards.

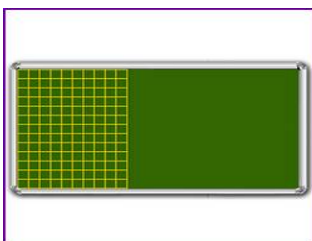

Chalkboard

Chalkboards are used worldwide as an efficient system for displaying and educational purposes. Fulfilling these requirements, we bring a wide range of Chalkboards manufactured by us using premium raw materials. Made by latest production techniques to enhance its quality, the Chalkboard range exported and supplied by us is highly demanded because of its modern design and reasonable price.

Range Available :

Revolving Display Board Stand

The market for Interactive whiteboards will explode over the next few years.

Over the next years there will be bought more than 1 million boards a year! So the total IWB Users will become a lot more. New software's and technologies will make these products last long for both education and business sector. From UK where the penetration for Interactive Whiteboards IWBs is really high the penetration increases all around the world now. Tell us how it is in your country - has the usage become big or are you at a starting point?.

This powerful new interactive whiteboard utilises infrared technology to give unparalleled performance in the board room, conference suite or even classroom. The Powerboard using advanced IR technology recognizes pen or finger movement when you write on it to interact with your audience. The surface is durable, cleans up easily and is coated to provide minimal glare. It allows you to annotate over any application and save your work. It is designed for distance learning and easily integrates into a complete conference network.

The NEW CERAMIC SURFACE option allows the user to use the Interactive Whiteboard just like the old style whiteboard without the worry off permanently marking the surface.

**Make any whiteboard interactive
Launched at BETT 2012**

The Sense instantly turns a traditional whiteboard into an interactive whiteboard in minutes - attach it to a traditional whiteboard or flat surface. The Sense is optimized for both lectures and presentations. Simply connect to a computer and a projector.

Mount onto the whiteboard magnetically; you can easily move it to different classrooms.

Flexible writing size

Place the Sense (Left/ Right/ Top/ Down) on your ordinary whiteboard.

Microsoft Office annotations tools

Just plug-n-play, user can draw over Powerpoint, MS Word s and Excel files directly

Touch is the robust alternative to a whiteboard. The Touch has all the features and working area of a whiteboard, but without the projector glare and running costs, lighting reflection or blinds being closed

Using the Touch LCD integrated interactive screen is simple and accurate to use by both teacher and student, so giving staff confidence to be at the front of the room showing off their work to colleagues. This precision interface is due to the advanced integrated "no space" construction between the screen surface and the sensing responder

It's so tough too. Users have used all kinds of objects to control the screen, and it's very reassuring to know that it is virtually indestructible. Gone are the days of having to clean the projector filters, and replacing expensive failed lamps, downtime in the boardroom, classroom or classroom is a thing of the past

Plug the Touch into a Windows 7 computer and you can take advantage of the new multi-touch features. Zooming in and out of photographs, maps and text becomes a direct manipulation using two fingers. Orientate and position your documents on the screen the way you want them effortlessly and quickly
